## WORK EXPERIENCE

### Frontend Developer

Nivaah Digital Private Limited

08/2023 - Present

Delhi/India

Nivaah Digital Private Limited is a dynamic E-commerce platform company that empowers businesses to thrive in the digital marketplace.

Achievements/Tasks

- ▣ **Successful E-commerce Platform Redesign:** Led the transformation of the company's website from Bootstrap to Tailwind CSS, delivering a modern, responsive, and resulting in a 15% improvement in page loading speed and a 25% increase in user engagement.
- ▣ **Mobile Responsiveness Improvement:** Implemented responsive design strategies, enhancing the mobile user experience, and contributing to a 40% rise in mobile sales and improved customer satisfaction.
- ▣ **Compare Page Development:** Designed and developed a feature-rich 'Compare Page' for the E-commerce platform, allowing users to easily compare product specifications.
- ▣ **Redux to RTK Query Migration:** Successfully migrated the company's data management system from traditional Redux to RTK Query, improving data-fetching efficiency and reducing boilerplate code.

## CERTIFICATES

NPTEL (The Joy of Computing using Python) (01/2022 - 03/2022)

In this course I learned programming essentials by using python and its core features.

ReactJS (HackerRank) (02/2021 - 01/2021)

## PERSONAL PROJECTS

Food Order App (06/2023 - 07/2023)

- ▣ The app helps customers access online food ordering platforms, search for the right restaurant or dish they want to order, place their orders and pay easily.
- ▣ There are many features you can implement in the app to make it easy and exciting to use. Here is a list of some absolutely necessary and additional features of the food delivery app.
- ▣ The successful creation of a stunning restaurant website using NextJS and the power of Tailwind CSS. With NextJS, I have utilized the power of server-side rendering, allowing the website to load quickly and efficiently, providing users with an exceptional browsing experience.
- ▣ One of the most exciting aspects of this project was implementing the CRUD operations. NextJS 13's built-in APIs and data-fetching capabilities made it effortless to create, read, update, and delete data within the website.
